

## FW-02 MOVING SKATE

*Moving Skates / Machinery Skates / Shifting Skates / Transport Skates*

Moving skates can be used wherever heavy objects need to be moved and make the movement much easier. Heavy duty sealed bearings are used to spread the load and ensure ease of movement.

The load can be lifted using either a roller crowbar or a jack, allowing the skates to be easily positioned. The platforms of the skates are fitted with a rubber surface which helps to provide grip and stability and to protect the object being moved. Nylon wheels to prevent damage to the floor.

Steerable Skates

PART NUMBER	FW02
CAPACITY (Ton)	2
SKATE SIZE (mm)	408x220x118
NUMBER OF WHEELS	8
WHEEL SIZE (mm each)	100x42mm
