The JCPT mini series scissor lift platforms are a lightweight single person lifting platform ideal for use in a variety of applications.

Ideal for maintenance work in warehouses, Shopping Centres, Hospitals, Schools etc.

This product offers an economical solution to your maintenance requirements with a safe working load of 240kg and three models available with max lifting heights of 1.7m, 2.5m and 3m

The unit is supplied with an integrated charger, battery charge indicator, built in levelling indicator, outriggers and emergency down and stop buttons.

Unlike a mobile tower that has to be erected and disassembled to move around a site or adjust the working height this unit is so versatile that it will pass through a standard door opening allowing access to most areas and its height can be adjusted with the touch of a button thus saving time and effort.
