

ZF20S Weighing Scale Pallet Truck

ZF20S is a high quality pallet truck with a built in weighing function. Dimensions across the forks are 555mm width x 1150mm long. This makes it ideal for the most common euro pallet size of 80x120cm, but equally it can also weigh the larger pallets often referred to as Blue GKN/Chep pallets - these are normally 120x120cm or 100x120cm.

Weighing Display Features Include:

- High Contrast Display with 18mm Segments
- 4 penlight batteries that can easily be changed
- Summation and sequence number giving the total number of weights totalised
- Auto tare and Auto shut-off
- Touch panel with domed buttons for easy use
- IP65 (NEMA4) design
- Operating temperature -10 to +40C
- Single electronic board for greater reliability
- Total weight of unit 122kg
- Lower power consumption, long battery life
- Fork width: 180mm / Gap between forks: 195mm
- Capacity: 2000kg / 1kg Graduation (increments)
- Accuracy: 0.1% of the weight applied to the scale
- Minimum fork height: 85mm / Max fork height 205mm
