Weight	320kg

SFH1016AG is a manual pallet stacker with a 1.6 metre lift height and 1000kg capacity.

It has a robust steel profile construction, with hand and foot operating levers.

It has been precision engineered for smooth operation and performance and offers an economical lifting solution for pallets, skids and dies.

Both small and compact, this makes the stacker truck ideal for operating in small areas.

Please note - this model will lift open bottom pallets and closed bottom pallets.

Adjustable Forks, drop forged and constructed in a heavy duty C section

Chip and corrosion resistant paint finish

Mechanical parking brake

Conforms to CE standards
